DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to an apparatus for chemical mechanical polishing, an eddy current sensing system, and an apparatus for semiconductor processing, classified in class 324, subclass 230.
 - II. Claims 23-33, drawn to a method of in-situ profile control, classified in class 324, subclass 230.
 - III. Claims 34-46, drawn to a semiconductor processing apparatus and a method, classified in class 324, subclass 230.
 - IV. Claims 47-53, drawn to an apparatus for semiconductor processing, classified in class 324, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility such as a device used to detect conductive film integrity. Invention II has a separate utility such as a device used to acquire thickness data for a conductive layer in a first region on a wafer where the first region has a length greater than a width. Invention III has a separate utility such as a device used to detect a distribution of

impurities in a conductive layer. Invention IV has a separate utility such as a device used to determine surface roughness of a conductive layer.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, and IV, the search required for Group II is not required for Groups I, III, and IV, the search required for Group III is not required for Groups I, II, and IV, and the search required for Group IV is not required for Groups I, II, and III, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
